

XdefML Assistant 1.1 Release Notes

09th September 2011

These release notes are divided into four sections:

1. Installing X-Tools
2. New features in this release
3. Known issues in this release
4. Bugs fixed in this release

1. Installing X-Tools

Important

Uninstall the previous version of X-Tools before installing a new version.
Close any open ACRA CONTROL tools before installing/uninstalling other ACRA CONTROL tools.

Note 1: X-Tools installation is not supported on the Windows 2000 operating system, as the installation includes .NET framework 4.0

Note 2: The user should install and run XdefML Assistant as an administrator on a Windows 7 operating system. This also applies to installation of Microsoft .NET Framework version 4.0.

2. New features in this release

For new features, see XdefML Assistant data sheet

3. Known issues in this release

Issue #	Description
XDA-4	XdefML Assistant.exe crashes if .net 4.0 is not installed
XDA-68	If user comments out a parameter then add a new parameter, the commented out code is stripped from file
XDA-70	No limitation on number of characters allowed as "Base name"
XDA-72	"Copy and Paste" functionality allows user to paste multiple number of location with same name, which then cause naming clash when saved.
XDA-75	XdefML Assistant crashes when using "save all" option
XDA-81	User needs to re-execute Setup.exe after a successful .Net Framework 4.0 installation on a Windows 7 operating system.

4. Bugs fixed in this release

Issue #	Description	Fixed In
XDA-6	Hotkey for adding settings does not work	1.1.0
XDA-7	No option to expand all nodes in the tree	1.1.0
XDA-13	XdefML Assistant fails to run on Windows 7	1.1.0
XDA-23	Sub-parameter names don't update unless you refresh	1.1.0
XDA-29	Editing the first constraint removed the other constraints	1.1.0
XDA-30	Syntax highlighting highlights correct value as incorrect	1.1.0
XDA-31	User needs to select 'Instrument' before menu options -> Open, Save or SaveAs are available	1.1.0
XDA-33	Unnecessarily asked to save when exiting	1.1.0
XDA-34	The editor should indicate it has saved the file	1.1.0
XDA-35	Tree minimizes after adding a channel	1.1.0

XdefML Assistant 1.1 Release Notes

09th September 2011
